Calculator Recommendation
7th and 8th grade Math only,
not needed for 6th grade Math

Students will be provided with the necessary calculators while they work in class. Our district supplies students with Texas Instruments calculators for classroom use, specifically the TI-84 Plus Graphing Calculators.

Some students purchase their own calculator for home, but it is not necessary (at the high school level, students are assigned a calculator for home). There are many websites that perform the same functions. Just type in "scientific calculator" for any mathematical computations, or if there is graphing involved, type in "graphing calculator". Some sample websites are listed below:
