

REVIEW OF ADMINISTRATIVE REGULATIONS

All rules/regulations or administrative guidelines developed pursuant to the Board's policies shall conform to the intent of said policies. The Board need not formally approve administrative rules/regulations or guidelines except in those instances in which the Superintendent or legal counsel believe such formal adoption shall be necessary or desirable because of potential litigation, public attitudes or possible student or staff reaction. The Board gives the Superintendent, or his/her designee, authority to develop and implement all necessary rules/regulations or administrative guidelines authorized by Board Policy or state statute. However, Policy Committee has the responsibility to review administrative guidelines to ensure that the intent of the policy is covered by the related guideline. Where appropriate, rules/regulations or administrative guidelines shall be published in the appropriate staff and student handbooks and a copy provided to the Board.
