

TEACHER GRANTS

There are many grants available which can enhance the curriculum. A teacher who wishes to apply for such a grant is encouraged to do so after discussing the grant with the building administrator and after demonstrating that the grant will help the teacher deliver instruction which is aligned with the curriculum. The teacher must indicate which benchmarks will be addressed by the grant on the Staff Development Project form.

The building administrator will evaluate the grant application and if the above requirements are met, will forward it to the Assistant Superintendent for CITA for approval.

If the teacher is awarded the grant, the building administrator is responsible for its administration, including any expenditures for teaching supplies, equipment or technology, and for assuring that there is compliance with the grant requirements.
