

NEGOTIATION GOALS AND OBJECTIVES

The Board recognizes its legal obligation to negotiate wages, hours and terms and conditions of employment with duly and legally recognized employee groups. The Board and its authorized representatives will adhere to the confines of the law and will discharge its obligations in an orderly, prompt and positive manner within the restrictions of the Public Employment Relations Act.

It is the intent of the Board to participate in the negotiation process by setting parameters, being provided with updates on the progress of negotiations, and giving final approval, in order to maintain the primary function of the district, which is the education of students.

Board members shall not discuss negotiations with any individual or individuals other than with each other or the Superintendent.
