

STUDENT TEACHER PROGRAM

As our professional responsibility, the South Lyon Community Schools supports and cooperates with teacher training programs of accredited colleges and universities.

1. Before student teachers are accepted, arrangements must be made to have their college or university assume the liability for any workers compensation which might result and/or to include in the contractual agreement that South Lyon Community Schools has no liability for workers compensation as student teachers are not employees.
2. Student teaching placements begin with the Administrative Services Office, and when approved are forwarded to building principals.
3. Student teachers must be screened in the same manner as all school employees new to the district.
