

FAMILY SCIENCE

EXTRAORDINARY
PLACES

January 17, 6:00-7:00 pm
Extreme Temperatures

For children aged 5-11
accompanied by an adult

This is not a SLCS sponsored event

M | MUSEUM OF NATURAL HISTORY
UNIVERSITY OF MICHIGAN

U of M Natural History Museum staff will be presenting three Family Science programs all about Extraordinary Places. Take a journey to some of the most extreme places on, and off, our planet to discover what it takes to live in these exotic locations and learn how important they are to our global ecology.

Thursday, January 17

Extreme Temperatures - Dive deep into the ocean to get a closer look at thermal vents and cross the tundras to our polar regions to explore life in the hottest and coldest places on Earth.

Each workshop will feature 3 or 4 hands-on stations to engage the whole family in science learning! This program is designed for families and an adult must accompany their child(ren) through the activities. We can accommodate up to 35 people per workshop, so registration is required. If you cannot attend, please let us know as soon as possible so that we can make your spot available for another family.

Mark your calendars for our future programs:
February 21 - Life without Light
March 21 - The Next Frontier

Lyon Township Public Library
27005 S. Milford Road • South Lyon
