

FAMILY SCIENCE

EXTRAORDINARY
PLACES

March 21
6:00-7:00 pm

M MUSEUM OF NATURAL HISTORY
UNIVERSITY OF MICHIGAN

**This is not a SLCS
sponsored event.**

U of M Natural History Museum staff will be presenting three Family Science programs all about Extraordinary Places. Take a journey to some of the most extreme places on, and off, our planet to discover what it takes to live in these exotic locations and learn how important they are to our global ecology.

March 21

The Next Frontier

Life has found ways of surviving even in the most unnatural of spaces. Learn how animals are adapting to life within our cities and how humans are learning to adapt to life in space.

Each workshop will feature 3 or 4 hands-on stations to engage the whole family in science learning! This program is designed for families and an adult must accompany their child(ren) through the activities. We can accommodate up to 35 people per workshop, so **registration is required**. If you cannot attend, please let us know as soon as possible so that we can make your spot available for another family.
